Our Training Process

Our extensive program is built to help you succeed.

- General Aircraft Familiarization
- OSHA & Safety Systems
- Specialized Honeywell & Embraer Manufacturer Training
- Rolls Royce Maintenance & Borescope
- Structures Training for Sheet Metal & Composites
- Principles of Troubleshooting

Tool Requirements

Sockets (12-point is recommended)

- 1/4 drive shallow 6-point or 12-point socket set
- 1/4 drive deep 6-point or 12-point socket set
- 3/8 drive shallow 6-point or 12-point socket set
- 3/8 drive deep 6-point or 12-point socket set
- Socket extension set for 1/4 and 3/8 drive
- Adapter sets: 1/4 <--> 3/8 drive <--> 1/2
- 3/8 speed handle

Ratchets:

- 1/4 drive
- 3/8 drive

Wrenches:

- SAE combination wrench set (1/4" to 1" recommended)
- SAE stubby wrench set
- Metric 10mm and 25mm combination wrenches
- Adjustable wrench
- SAE Allen wrench set

Pliers:

- Needle nose
- Diagonal / side cutter
- Duck bill
- Slip-joint
- Channel lock
- Safety-wire pliers

Hammers:

- 16 oz. ball peen
- Dead blow / soft face

Miscellaneous:

- Flashlight
- Headlamp
- Inspection mirror (2" diameter)
- Magnetic pick-up tool
- Feeler gauge set
- 6" steel ruler
- Tape measure
- Dental pick / O-ring tool set
- Punch set
- Screw extractor / Easy-out set

Note 1: Cordless drills with an adjustable torque clutch are optional – do NOT use on a Hammer setting and do NOT use an Impact drill.

Note 2: Utility knives are a sign-out tool only, Multi-tools/Leatherman's are optional.

Note 3: You may bring a multi-meter and mark and use it "FOR REFERENCE ONLY". Leave all other tools that will need to be calibrated in the field (i.e. torque wrench) at home.
